Bordeaux, France | +33-060-584-3923

deepayans77@gmail.com | linkedin.com/in/deepayansarkar | github.com/deepayans

France Work Authorization / Available: May 2026

PROFESSIONAL SUMMARY

Data Science student with 4+ years of industry experience in data analytics at Accenture, transitioning into machine learning and AI. Skilled in Python, SQL, and statistical modeling, with hands-on experience building NLP models, recommendation systems, and predictive analytics solutions using scikit-learn, XGBoost, and TensorFlow. Experienced in working with large-scale datasets, ETL pipelines, and A/B testing to drive data-informed decisions. Passionate about applying machine learning to real-world problems and seeking a Data Science Intern role to further develop and deploy scalable AI solutions.

EDUCATION

KEDGE Business School

Master of Science in Data Analytics for Business - Master 2nd year

Bordeaux, France

Sep 2025 - Present

University of Engineering & Management

Bachelor of Technology in Electronics and Communication Engineering

Kolkata, India

Jul 2017 - May 2021

PROFESSIONAL EXPERIENCE

Data Analyst/Data Science Associate - Accenture

Aug 2021 - Aug 2025

Kolkata, India

- Engineered data pipelines processing 10M+ records daily and developed Power BI dashboards tracking 50+ KPIs, reducing processing time by 35% and improving operational efficiency by 20% through ETL optimisation and data visualisation solutions
- Designed and maintained cloud infrastructure on Google Cloud Platform (BigQuery, Dataflow, Cloud Storage) ensuring 99.9% uptime, conducted A/B testing and statistical analysis on datasets with 1M+ rows to optimise product features and improve customer experience by 30%
- Collaborated with 15+ cross-functional stakeholders to deliver 12+ analytical projects, automated reporting processes saving 40+ hours monthly, and mentored junior analysts on data analysis best practices and SQL optimisation techniques

MACHINE LEARNING AND DATA SCIENCE PROJECTS

Multi-Label Classification for Skincare Products - L'Oreal Hackathon

KEDGE Business School

- Developed and deployed a multi-label text classification model using LinearSVC and One-vs-Rest classification to classify 6,240 products across 33 categories, achieving a weighted F1 Score of 0.67, in line with industry benchmarks
- Engineered NLP pipeline with TF-IDF vectorisation (word and character n-grams) and optimised per-class thresholds for improved performance

Spotify Music Recommendation System - Unsupervised Learning

KEDGE Business School

- Built an unsupervised music recommendation system by applying K-Means clustering to song-level audio features to uncover latent user taste patterns and evaluated performance using the Silhouette, Calinski-Harabasz, and Davies-Bouldin indices
- Performed feature engineering and preprocessing to enhance clustering stability and designed a similarity-based recommendation approach to enable personalised and cold-start recommendations

AI Persona Bots for Marketing Research - BNP Paribas and CGI Hackathon

KEDGE Business School

- Built AI-simulated customer personas using Azure AI Foundry and GPT-4o to accelerate credit product launches, processing 2,438 survey responses across 8 distinct customer segments with 88.6% relevance, 97.8% coherence, and 100% fluency scores
- Engineered end-to-end pipeline with persona generation, NLP-based sentiment analysis, and automated insight synthesis, reducing marketing research time from 4-8 weeks to under 1 hour whilst maintaining high-quality customer simulation accuracy

TECHNICAL SKILLS

Programming and Machine Learning: Python (pandas, NumPy, Matplotlib, scikit-learn, XGBoost, LightGBM, PyTorch, TensorFlow), SQL, Statistical Modelling, Supervised and Unsupervised Learning, Natural Language Processing (NLP), Deep Learning, Feature Engineering, Model Evaluation and Cross-Validation, MLOps

Data Tools: Power BI, Tableau, Google Analytics, Jupyter, Git, Apache Spark, Airflow

Cloud and Databases: Google Cloud Platform (BigQuery, Dataflow, Cloud Storage), Azure AI Foundry, SQL Server

Core Competencies: Recommendation Systems, Forecasting, Customer Analytics, A/B Testing, ETL Pipelines, Model Interpretability

CERTIFICATIONS

Google Cloud Certified: Associate Cloud Engineer | SQL for Data Science (Coursera) | Microsoft Azure AI - 900
